Joint
2015 Annual Health Econometrics Workshop &
Seventh Australasian Workshop on Econometrics and Health Economics
December 11-14, 2015
University of Hawaii, Mānoa

This invitational workshop provides a forum to discuss the use of econometric and other quantitative methods to address issues in health economics and policy, health services research, and outcomes research.

We invite papers that develop new methods, assess existing methods, or highlight the use of non-proprietary software that address topical issues in health economics, health services and policy. Papers will be chosen for their originality, innovativeness, and rigor. In addition, selection will try to balance number of papers from US, Australia and other countries.

Close to an hour will be devoted to each paper selected for discussion (approx 15-16). Unlike the AHEW style in the past, this year we will have the author present their own paper followed by critiques from a discussant.

Interested researchers should submit a full working paper by June 15, 2015, in PDF format. Online submissions can be made at www.healtheconometrics.org/submission.php

Submitted papers should be unpublished and not accepted for publication at a peer reviewed journal. Invited participants will be notified by August 1, 2015. Discussants for each paper will be selected with consent from the author.

Meals will be provided for all. Authors will be required to register at a reduced fee that will cover three nights of hotel lodging. All other expenses, including transportation, are the participants’ responsibility.
